09. Lipor | Start of the City Loops Project - Closing the loop for urban material flows

ACR+ member [Lipor](#) is part of the European CityLoops project, launched in October 2019 in Denmark, whose main objective is to **reduce the consumption of material and natural resources in the urban space**, promoting the circular economy.

This project, funded by the European Commission's H2020 program for EUR 10 million, counts 28 partners, including the municipality of Apeldoorn (also partner in the [SMART WASTE](#) project and situated in ACR+ member [Cleantech Region](#)). It is aimed at investigating **construction and demolition waste and organic waste flows**.
